

Books match sounds

All children are able to use their phonic skills that they have been taught to access any reading materials they are given.

The books that children have match the sounds that they have been taught. No child has a reading book with unfamiliar words in.

All of our books are book banded and contain ZPD levels in the Accelerated Reader books to ensure that the books match the children's reading abilities.

Many of our children change their books daily, some change them weekly, depending on the size of the book or the genre they are reading.
